User Manual

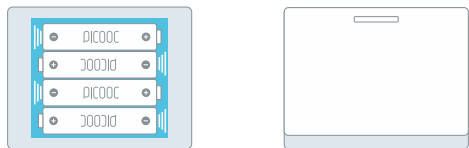

Read the instruction manual carefully before using the device.

Connect

01 Open the package and install the batteries

Remove the transparent protective film, open the battery cover under the scale, install the batteries and close the cover.

02 Scan the QR code to download PICOOC APP, register an account and then operate according to the guidance.

For old accounts, please select "Setting – Equipment Management" in PICOOC APP, chose the "+" symbol and then operate according to the guidance.

You may also search for PICOOC in APP Stores or Google Play.

* Specific connecting methods may change due to APP upgrades, please refer to the latest version.

Weight Measurement

01 Before measuring, please place the device on hard and flat ground to ensure accuracy.

Error may be larger for the following users:

- Growing children
- Elderly people
- Fever patients due to cold and other reasons
- Osteoporotic patients with very low bone mineral density
- Edema patients
- Artificial dialysis patients
- People who work on fitness or sports (or similar people)

Please avoid using the scale in the following situations, as far as possible:

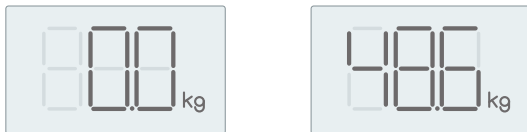

- After strenuous exercise
- After sauna or bath
- After heavy drinking
- After taking in much water and food

02 Click "Measure" in the APP and use it barefooted

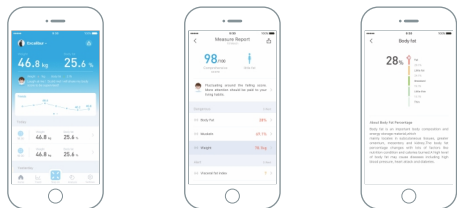

- * To be barefooted is necessary for normal measurement of body fat and
- * Please stand properly on the device: take the centre as an origin, and place your feet naturally on both sides.
- * Standing too close to the edge may turn over the device and cause body damage or affect the measurement accuracy.

- 03 LED numerals may change for a few seconds when measuring. After the measurement is done, the flicker will stop to show the weight.

- 04 When measurement is successfully done, data will be sent to PICOOC APP, and you may check the measurements and analysis in your APP.

* Use the scale cooperatively with the APP to check multiple body data of the user, including 6 items (weight, BMI, fat, muscle, bone mass, water) from BIA, and other 4 items (body type, protein, basic metabolism, visceral fat) from PHMS.

* BIA (Bioelectrical Impedance Analysis) is an electrical impedance spectroscopy which does not exclude errors like individual differences.

* PHMS (PICOOC Health Measurement System) is a body health evaluation and inspection system developed by PICOOC™.

* Any data or advices in the APP are for reference only, and they do not replace or stand for professional diagnosis of medical institutions.

Safety and Maintenance

- ⚠ Patients with pacemakers or other medical equipments must not use this device!
- ⚠ If you are pregnant, please consult a doctor for advice before using!
- ⚠ Do not place the device on slippery surfaces when using!
- ⚠ The device is covered by glass. In order to prevent injury, please make sure that the glass is not damaged before using.

- Please place the device on hard and flat ground when using, and do not place other objects underneath.
- For body fat percentage and other results, please use it barefooted.
